# Contents

<b>Preface</b> .....	ix
<b>List of Contributors</b> .....	xi

---

## Part I Foundations

---

### 1 Introduction to Music Transcription

<i>Anssi Klapuri</i> .....	3
1.1 Terminology and Concepts .....	7
1.2 Perspectives on Music Transcription .....	11
1.3 Outline .....	17

### 2 An Introduction to Statistical Signal Processing and Spectrum Estimation

<i>Manuel Davy</i> .....	21
2.1 Frequency, Time-Frequency, and Cepstral Representations .....	21
2.2 Basic Statistical Methods .....	28
2.3 Bayesian Statistical Methods .....	39
2.4 Pattern Recognition Methods .....	52

### 3 Sparse Adaptive Representations for Musical Signals

<i>Laurent Daudet, Bruno Torr�sani</i> .....	65
3.1 Introduction .....	65
3.2 Parametric Representations .....	68
3.3 Waveform Representations .....	70
3.4 Conclusion .....	97

---

**Part II Rhythm and Timbre Analysis**

---

**4 Beat Tracking and Musical Metre Analysis**

<i>Stephen Hainsworth</i> .....	101
4.1 Introduction .....	101
4.2 Summary of Beat-Tracking Approaches .....	102
4.3 Musical Background to Rhythmic Structure .....	105
4.4 Onset Detection .....	107
4.5 Rule-Based Approaches .....	111
4.6 Autocorrelation Methods .....	112
4.7 Oscillating Filter Approaches .....	113
4.8 Histogramming Methods .....	115
4.9 Multiple Agent Approaches .....	116
4.10 Probabilistic Models .....	117
4.11 Comparison of Algorithms .....	124
4.12 Conclusions .....	127

**5 Unpitched Percussion Transcription**

<i>Derry FitzGerald, Jouni Paulus</i> .....	131
5.1 Introduction .....	131
5.2 Pattern Recognition Approaches .....	133
5.3 Separation-Based Approaches .....	142
5.4 Musicological Modelling .....	153
5.5 Conclusions .....	160
5.6 Acknowledgements .....	162

**6 Automatic Classification of Pitched Musical Instrument Sounds**

<i>Perfecto Herrera-Boyer, Anssi Klapuri, and Manuel Davy</i> .....	163
6.1 Introduction .....	163
6.2 Methodology .....	169
6.3 Features and Their Selection .....	171
6.4 Classification Techniques .....	184
6.5 Classification of Isolated Sounds .....	188
6.6 Classification of Sounds from Music Files .....	193
6.7 Conclusions .....	199

---

**Part III Multiple Fundamental Frequency Analysis**

---

**7 Multiple Fundamental Frequency Estimation Based on Generative Models**

<i>Manuel Davy</i> .....	203
7.1 Noisy Sum-of-Sines Models .....	204
7.2 Off-line Approaches .....	210

7.3 On-Line Approaches .....	217
7.4 Other On-Line Bayesian Approaches .....	225
7.5 Conclusions .....	227

## 8 Auditory Model-Based Methods for Multiple Fundamental Frequency Estimation

<i>Anssi Klapuri</i> .....	229
8.1 Introduction .....	229
8.2 Musical Sounds and F0 Estimation.....	231
8.3 Pitch Perception Models .....	234
8.4 Using an Auditory Model as a Front End .....	244
8.5 Computational Multiple F0 Estimation Methods.....	248
8.6 Conclusions .....	264

## 9 Unsupervised Learning Methods for Source Separation in Monaural Music Signals

<i>Tuomas Virtanen</i> .....	267
9.1 Introduction .....	267
9.2 Signal Model .....	268
9.3 Independent Component Analysis.....	274
9.4 Sparse Coding.....	278
9.5 Non-Negative Matrix Factorization.....	282
9.6 Prior Information about Sources .....	284
9.7 Further Processing of the Components.....	286
9.8 Time-Varying Components.....	289
9.9 Evaluation of the Separation Quality .....	294
9.10 Summary and Discussion .....	295

---

## Part IV Entire Systems, Acoustic and Musicological Modelling

---

### 10 Auditory Scene Analysis in Music Signals

<i>Kunio Kashino</i> .....	299
10.1 Introduction .....	299
10.2 Strategy for Music Scene Analysis .....	304
10.3 Probabilistic Models for Music Scene Analysis .....	313
10.4 Conclusion: From Grouping to Generative Estimation .....	324

### 11 Music Scene Description

<i>Masataka Goto</i> .....	327
11.1 Introduction .....	327
11.2 Estimating Melody and Bass Lines.....	330
11.3 Estimating Beat Structure .....	341
11.4 Estimating Drums .....	342
11.5 Estimating Chorus Sections and Repeated Sections .....	342

11.6 Evaluation Issues .....	355
11.7 Applications of Music Scene Description .....	355
11.8 Conclusion .....	358
<b>12 Singing Transcription</b>	
<i>Matti Ryyänen</i> .....	361
12.1 Introduction .....	361
12.2 Singing Signals .....	364
12.3 Feature Extraction .....	368
12.4 Converting Features into Note Sequences .....	375
12.5 Summary and Discussion .....	390
<b>References</b> .....	391
<b>Index</b> .....	429
